Equipment

Metalworking

Sheetmetal processing from :

- steel
- galvanized steel
- stainless steel
- aluminum alloys and copper

We produce at three workplaces –Tedražice, Sušice, ejkovy. Construction activity is performed at the Workplace Klatovy.

Currently, the largest production of metal is from workplace Tedražice. There are about 60 workers. Production area approx. 2000 m2. Paintshop with powder coatings is here.

Workplace Sušice has 20 employees and production area of 1500 m2, produces mainly manufacture machine frames, pallets, stairs, etc.

Used technological operations

Welding of all kinds of metall materials (certificates SN EN 3834-2 and DIN 6700-2 C2) For welding of the metal materials are used machines from Fronius and Megatronic.

Workplace ejkovy has the largest production area, approximately 3200 m2. Taken were 2 years ago and reconstructed to metal processing. Currently 20 employees are working with growth assumption to 50 employees. Here is also paintshop with liquid colors.

Point welding

Bending – three CNC pressbrakes

Cutting operation

- turning
- milling
- boring
- special with cooperation)

Divide (sheet-metal, profiles)

- shearing
- laser-cutting machine (since 2006)
- plasma cutting machine
- saw machine
- punching

Surfacing

Internally – paintshop with liquid colors and with powder coatings

Externally – galvanizing, hot-dip galvanizing, tinning, anodizing (eloxal process)

Message from chairman – Dipl.Ing. Petr Makrlík

Let me note from the perspective of a manager of the company.
At first several historic milestones about Koramex a.s.

year 1991...the company was founded as Koramex - transformation of the former joint venture AGROSTAV

year 1994...the company managed from the problems and Koramex as the company was renamed in 1994

year 1997...since this year we have been managed without loans, managed to find a promising product range

year 2004...since 2004 was our company introduced a certified welding rolling stock according to
CSN EN 729 (re-certified in 2008 CSN EN 3834-2)

year 2005...the company was certified by SLV Hannover according to DIN 6700-2 C2 for welding for Railways

year 2006...was bought a CNC laser cutting machine TRUMATIC L3030 (Trupmf)

year 2008...the company obtained the quality certificate according to CSN EN ISO 9001:2001

year 2009...the company has retained in the marketplace during worldwide financial crisis

year 2010...the company was certified according to DIN EN 15085 (1st half of year 2010)

The company Koramex a.s. managed bad times during the financial crisis.
Here we have helped by satisfied customers with whom we maintain long-term relationships.

In 2010 we are building a new production hall. Our production capacities are increasing and we would like to populate these.

It is the one of the reasons our participation here
- at Vienna TECH 2010.

We think we offer potential customers with good merchandise :

- quality certified by long-term cooperation with demanding partners
- long-term experience in the branch
- certified workplace with experienced staff
- fair cooperation

Thanks
Dipl. ing. Petr Makrlík, Managing Director
