

BILLABONG HYDRAULIC WATER RAMS (PUMPS)

UNIQUE OPPORTUNITY TO OBTAIN MANUFACTURING LICENCE
PROVEN TECHNOLOGY OVER MANY YEARS

(Document Reference #: 6996)

Page 1/3

Misal Technologies Pty. Ltd. is currently seeking the opening of new global markets for our Billabong Hydraulic Rams (Water Rams), and wishes to establish manufacturing facilities in various, strategically located global geographical areas to achieve these objectives.

In particular we wish to expand exposure of our Billabong Hydraulic Rams to regions outside Australia. Billabong Hydraulic Rams have been manufactured and used in Australia for the last 155 years by thousands of satisfied customers.

FEATURES:

- Billabong Water Rams have a well-known reputation throughout Australia. They are one of the oldest Water Rams in the world (historical details available on request).
- The Rams **do not require electricity, fuel or steam** to operate.
- They possess simplicity of construction and operation – only 2 moving parts.
- Powered only by running water.
- Require very minimal or almost no maintenance.
- Heavy duty cast Iron base and Dome.
- No plastic parts used.
- Renowned for their longevity (60+ years) and operation reliability.
- In some instances second or third generation Australian farmers are still operating the same Ram.
- Capable of operating with a Head delivery of up to 200 feet (61m).

Our company is seeking Licensees for predetermined geographical areas.

Offers for outright IP acquisition will also be considered.
