NUOVA PLASTILINE

Nuova Plastiline is a historic company in the production of packaging and plastic materials, born from a long and specialized experience in the sector.

Nuova Plastiline is established more than thirty years ago with the aim of satisfying the growing demand for high quality flexible materials and fits with professionalism and dynamism in the Italian and European market.

A headquarters of 2,500 square meters, a professional and competent team, using the latest technological machinery, the use of materials that conform to European quality standards:

Nuova Plastiline is a reliable and professional partner.

The company manufactures products for the international market in polypropylene (PP), Polyethylene (PE-LD / PE-HD), Bi-oriented Polypropylene (PP BOT) and Coextruded Polypropylene (PP COEX).

To efficiently and functionally support its production as a leader in the plastics sector, **Nuova Plastiline** uses the latest machinery able to guarantee maximum precision and reliability, providing the customer with a high performance end product.

The highest quality and the absolute integrity of the products is guaranteed by accurate quality control processes, carried out by qualified personnel with twenty years of experience in the sector.

A delicate operation that guarantees the delivery of products that are perfectly intact and meet the needs of the customer, ensuring a high standard.

Sustainability

Each project is developed in full respect of the environment that surrounds us, so the company has been pursuing the path of sustainable development for years. Sustainable development, product responsibility, safety at work and quality management are the key points on which our company policy is based.

Sustainability of protection packaging

Sustainability of protection packaging. For more than 30 years, Nuova Plastiline has been engaged in the field of protective packaging. Our success is a direct consequence of our ability to balance our resources with customers' packaging needs and environmental responsibilities. We constantly try to improve the environmental profile of our products, without compromising their performance.

New Materials and technological solutions eco-friendly

To achieve a product with low environmental impact, it is possible to follow different paths that envisage a review of business processes, in terms of energy savings and reduction of emissions, a conscious management of the end of life of the product and the adoption of eco-friendly materials.

For this purpose we have developed the following products:

- Recycled low density polyethylene bags
- Biodegradable bags, obtained from corn starch
- Biodegradable bags made from PLA polylactic acid
